January 22, 2022

## 1 Git Setup

The group began by setting up our github accounts and the repository. The visibility was set to private to comply with McMaster's code of conduct.

x	y	z
1	22	3
$y + 4$	$k \cdot x$	text

## 2 First Lesson

## 3 Second Lesson

## 4 Conclusion

```
def are_valid_groups(groups, studentNum):

    length = len(studentNum)
    count = 0

    for group in groups:
        count = 0
        for students in studentNum:
            if (group.count(students) == 0):
                break
            if (group.count(students) == 1):
                count += 1

        if count == length:
            return True

    return False

print(are_valid_groups(groups, studentNum))
```
